

ELECTRO-CHEM ETCH INC.

Model 200 "Supervisor" Power unit

The worlds best & most powerful electro-chemical etching machine

Features:

- Continuously adjustable output power from 0-40 volts.
- 500 watts of power.
- Rugged SCR circuitry, and low internal impedance.
- Mark (AC) & Etch (DC) modes.

The Model 200 is a very powerful and controllable etching machine. It has variable output voltage (0-40), low impedance, high power (500 watts), SCR phase control circuitry. Depths of etch in excess of 0.010" can easily be achieved and can be controlled to within +/- 0.001". This machine is suited to Aerospace applications where deep etching is a requirement by specifications. It is approved by most major aerospace corporations' specs.
